Profile:

Third-year Computer Science student at Addis Ababa University with a strong foundation in backend development, databases, and algorithmic problem-solving. Experienced in Java, Spring Boot, and MySQL, with hands-on projects in REST API development and data-driven systems. Highly motivated to apply technology and analytics to real-world and impact-driven problems, particularly in fintech and digital services.

Education

Addis Ababa University — B.Sc. in Computer Science | **GPA: 3.91/4.00**

Expected Graduation: 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Advanced Database systems, Networking and Data Communication

Technical Skills

Programming Languages: Java, C++, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, JDBC

Tools & Technologies: Git, MySQL, IntelliJ IDEA, VS Code, Postman

Core Competencies: Data Structures & Algorithms, Object-Oriented Programming, Database Design, RESTful API Development

Projects

Ecommerce Application — *Java, MySQL, SpringBoot*

- Developed a RESTful backend API supporting product, user, and order management.
- Implemented CRUD operations using Spring Data JPA with MySQL for persistent storage.
- Designed relational database schemas to manage entity relationships efficiently.
- Tested and validated API endpoints using Postman and structured modular service layers for scalability.

Personalized Learning System — *Java, MySQL, SpringBoot*

- Developed a RESTful backend system that allows users to create and manage questions, flashcards, quizzes, and learning materials.
- Implemented file upload and download functionality for storing learning resources on the server.
- Applied pagination to optimize database query performance and improve response times.
- Designed relational database models to manage users, categories, topics, questions, notes, and flashcards.
- Tested APIs using Postman and improved scalability through modular service-layer design.

Volunteering Experience

Chairperson, High School Charity Club

- Led and coordinated a student volunteer team, organizing fundraising and outreach activities.
- Raised over 50,000 ETB to support a homeless shelter, elderly individuals, and provide sanitary products and educational materials for women and children in public schools.

Achievements

- Solved 60+ data structures and algorithms problems on LeetCode.
- Participated in university-level competitive programming contests.
- Achieved 5th place in a regional high school science fair.
